

The tournament will be played using the generally accepted “Rebuy/Add-On” format.

**Good news for you, Daniel!**

I'm all in!

During the first 5 blind levels, you can buy another **7,500 chips for \$150** or **15,000 for \$300** if you get eliminated. Players may also add 7,500 chips for \$150 to their stack at any time during this rebuy period, **as long as they have 7,500 chips or less.**

Wait a minute! What if you have more than 7,500? At the end of the rebuy period, **every player** will have the option of purchasing an “add-on” -- 20,000 chips for \$200.

**Great news for everyone else, too!**

Look! They're buying in AGAIN!

The more times other people buy-in/rebuy/add-on, the more money there will be in the prize pool for you to win!

Technical rules:

- If a player chooses to rebuy, 7500 chips will be added to their stack the following hand.
- Any player may rebuy at any point during the rebuy period. If rebuying immediately, they will retain their same seat. If they miss a hand, their seat will be re-assigned randomly.
- A player cannot give chips to another player at any point, other than in a pot.
