

The tournament will be played using the generally accepted “Rebuy/Add-On” format.

Good news for you, Daniel!

I'm all in!

During the first 5 blind levels, you can re-enter unlimited times if eliminated. You'd get another **5,000 chips for \$100**. However, players with 5,000 chips or less may also top-up their stack. They would receive an additional 5,000 chips for \$100. This option is available before start of play and through the break. That means you could start with 10,000 chips for \$200

Wait a minute! What if you have more than 5,000? At the break, **every player** will have the option of purchasing an “add-on” -- 5,000 chips for \$100. Tournament will become a freezeout after the break

Great news for everyone else, too!

Look! They're buying in AGAIN!

The more times other people buy-in/re-enter/add-on, the more money there will be in the prize pool for you to win!

Technical rules:

- If a player chooses to top-up, 5000 chips will be added to their stack the following hand.
- A player may re-enter at any point during the rebuy period. If re-entering immediately, they will retain their same seat unless they choose to draw a random seat. If they miss a hand, their seat will be re-assigned randomly.
- A player cannot give chips to another player at any point, other than in a pot.
